

Supplemental School Enrichment Program

Health & Safety Guidelines: Fall 2020

We're here to help in any way that we can.

We understand there is much concern around the plans for school this fall. Parents have reached out to us expressing their concern for child care should schools have an online component, in some cases, entirely virtual learning.

We will provide on-site offerings and child care options that supplement what the schools will offer. We will support the virtual learning process at our facility with in-person enrichment coaches that will help implement virtual learning.

While this is a fluid situation, the Camp NAC & Newtown Athletic Club teams have already started planning. As States and school districts release their plans, we will create programming to match the school's model that will provide support for students of all grade levels (ages 3-18). Students will be grouped with students in their district, school and grade.

We have served our community for the last 42 years and we will always be here, when you need us.

OUR ENHANCED STANDARDS

Updates specifically for the Supplemental School Enrichment Program.

We will continue to adjust our programs and guidelines based on the CDC and local department of health regulations.

- Heightened levels of cleaning and sanitation systems .
- Limited capacity in each group – students separated by district, school & grade.
- Activities created to increase distancing and minimize sharing of supplies.
- Scheduled healthy hand washing for students and enrichment coaches throughout the day.
- Increased time outside and under tents.
- Increased employee protective measures and training.
- Educating and enforcing for a safe environment.
- Masks required for students walking from one workspace to another on NAC campus.

In collaboration with the CDC Guidelines, the Bucks County Department of Health and the local school districts, we are continuously updating our new protocols and standards to ensure we can operate a safe environment for your children.

Preparing for a Healthy Environment to Learn

We are making space and service updates to maintain hygiene, safety and physical distancing best practices in three ways:

Increased Cleaning + Sanitizing

We've implemented heightened cleaning measures to ensure the health and well-being of all students and their families. We are cleaning more frequently, have hand hygiene scheduled into our days, created sanitation stations to provide easier access and will use enhanced technology for an improved cleaning, sanitation and disinfection strategy.

Activities and Structure

All students will spend their day in small groups; separated by district, school & grade. Work spaces & daily activities will take place throughout our 26-acre campus, 250,000 sq. ft. facility and NAC Sports Training Center. This will ensure maximum safety and a continuous practice of physical distancing.

Student + Employee Protection

We ask that all students **have their temperature taken at home before coming to their new learning environment.** Any student that has not had their temperature taken prior to arriving, will have their temperature taken by a staff member. Anyone with a temperature equal to or above 100 degrees is not permitted to attend our enrichment program until further notice. Any person who show signs of illness during the school day will have their temperature taken. Each team member has had training on our updated cleaning policies and is provided cleaning supplies, a mask and sanitizer.

Increased Cleaning + Sanitation

Knowledge is power. We want families, students and employees to know they are safe in our facilities. For us to ensure their safety, we must understand the difference between effective cleaning, sanitizing and disinfecting. This will now be a vital part of each team member's position. Being able to distinguish between these methods and implementing them effectively will help us kill viruses, such as COVID-19 and prevent its spread.

☑ Clean

What it does:

Removes soil, dirt, and debris from surfaces. It does **not** kill microorganisms.

What products do you use?

Soaps, detergents, water and microfiber towels to physically remove soil, dirt, and debris from surfaces.

Why clean?

Cleaning **lowers the count of germs by removing them** from a surface, not necessarily killing them.

☑ Sanitize

What it does:

Kills a high percentage (99.9%) of microorganisms on surfaces.

What products do you use?

Heat (i.e. steam, hot water, and hot air) and requires at least 171° surface contact or an EPA (Environmental Protection Agency) registered product with specific contact time to kill microorganisms on surfaces.

Why sanitize?

Sanitizing **reduces and kills the amount of germs** on a surface to a safe level recognized by the EPA, but it does not eliminate the occurrence and growth of bacteria, viruses, and fungi. **It is safe for kids** and food prep surfaces.

☑ Disinfect

What it does:

Kills a higher percentage (99.999%) of microorganisms on surfaces.

What products do you use?

Disinfecting uses an EPA registered product with specific contact time (1-10 minutes, depending on the chemical) to kill harmful microorganisms, like bacteria and pathogens on surfaces.

Why disinfect?

Disinfecting reduces and kills the amount of germs on a surface to a safe level recognized by the EPA, **and reduces the occurrence and growth of bacteria, viruses and fungi.**

Increased Cleaning + Sanitizing

Ensuring a clean and safe environment is not a one time event at Camp NAC. We have an on-going cleaning, sanitizing and disinfecting system to ensure our facilities and campus meet and exceed the standards set by the CDC, local school districts and Bucks County Department of Health.

Hand Washing Hygiene

INCREASED CLEANING + SANITATION

Hand Hygiene Training

- Prior to coming to our program each week, parents will be asked to review health & safety guidelines at home with their children
- Hand washing will be reviewed at the start of each week
- Hand washing technique signs are hung in each workspace and bathroom
- Designated hand washing times will be built into each schedule, for example:
 - ✓ We will continue to wash our hands before and after snacks and meals
 - ✓ Students will take a break to wash their hands with soap and water or use hand sanitizer between activities

Sanitation Stations

INCREASED CLEANING + SANITATION

Additional sanitation wipes and hand sanitizing stations were added throughout the NAC Campus

Sanitation Station

- New cleaning protocol communication
- Sanitation wipes + trash can
- Hand sanitizer

Enrichment coaches will be required to clean and sanitize in between each activity.

Each space will have a designated sanitation station for convenience.

Enhanced Products + Technology

INCREASED CLEANING + SANITATION

Sanitation Wipes

Antibacterial Gym Wipes will be used to clean, deodorize, and kill bacteria, viruses, and fungi on all surfaces and equipment.

Hospital-Grade Disinfectant

Hospital-grade disinfectant has always been a staple of Newtown Athletic Club's cleaning protocol. We recently upgraded to Hi-Con PF which is on the EPA list to kill viruses, including COVID- 19.

MYSHIELD Surface Solution

Made with a patented product, Zetrisil. Zetrisil is a patented product with a formula that instantly kills and has a 99.9999% broad spectrum kill against bacteria & viruses, with the additional benefit of a persistent kill up to 28 days per application.

Enhanced Products + Technology

INCREASED CLEANING + SANITATION

Electrostatic Sprayer

Electrostatic sprayers patented technology provides an electrical charge to solutions, allowing them to wrap conductive surfaces with an effective and even coverage. Double-charged particles envelope all conductive surfaces – shadowed, vertical and underneath to provide a 360 disinfectant without touch.

Nanoseptic Self Cleaning Wraps

Powered by light, Nanoseptic surfaces utilize mineral nano-crystals which create a powerful oxidation reaction. Working 24/7, the surface continually oxidizes organic contaminants. Unlike traditional disinfectants and cleaners, the Nanoseptic surface uses no poisons, heavy metals or chemicals, and nothing is released from the surface since the nano-crystals are molecularly bonded to the material.

Activities & Structure

Knowledge is power. We will follow all federal, state, and local regulations as it pertains to building capacity, as well as the spaces within. The CDC recommends, and local regulations require, enhanced physical distancing when possible and masks in public spaces. We will adjust all protocols as needed.

The New School Day

(All programs will be re-evaluated when necessary)

- In-person enrichment program for ages 3-18
- Every weekday 9am-3pm
- Enrichment coaches that will help implement virtual learning
- Curriculum-based with physical education, art & crafts, swimming, sports, music, reading & more!
- Campus nurse

What to Bring

- A peanut-free lunch & snack
- A backpack for your belongings
- Everything needed to complete all your school work: notebook, pencil, laptop/charger & textbooks
- Wear comfortable shoes & clothes

Program Add-Ons

- Before & after care
- Breakfast and/or lunch
- Parisi Speed School, swim lessons, gymnastics & baseball lessons

Health Guards

NEW ACTIVITIES + STRUCTURE

All Enrichment Coaches & Program Managers

Our whole team will clean, sanitize and disinfect throughout the day. Known as, “Health Guards” their role will also be to help encourage our campers to physical distance when applicable, focus on hand hygiene, and cleaning their spaces before and after their activities. Just like crossing guards and life guards ensure our safety, NAC Health Guards will ensure the safety of all of our campers with our new sanitation, spatial and safety protocols.

Documentation + Communication

To keep consistent communication with our families, our team will document any issues and/or questions that arise throughout their day to the Camp Nurse. Our nurse will communicate necessary information to all parents via calls and emails as she deems necessary.

All campers will be expected to all rules and guidelines. If a child is struggling to follow directions the camp managers and parents will work together to come up with a behavior plan.

Camper + Employee Protection

Temperature Checks

All students are asked to have their temperature checked prior to coming to our program each day. Any individual who exhibit signs of illness, such as a fever over 100 degrees fahrenheit, cough, or shortness of breath will be asked not to enter the facility and to seek medical attention.

Reusable Face Masks + Sanitizer

All enrichment coaches will receive their own face mask and sanitizer to keep with them throughout the day. Masks will be worn by staff, but is not required for campers while they are in their assigned work place.

Cleaning + Sanitizing Products

Enrichment coaches have been trained on proper cleaning, sanitizing and disinfecting procedures for the camper supplies, tables, chairs, and all surfaces used each day.

In the Event of a Confirmed or Suspected Case

Immediate Action

Any person showing symptoms will be placed in a designated private room separate from other children. We will contact their emergency contact to arrange transportation home. All areas used by the person will be closed off for sterilization.

Contact Tracing

Before any conversation with the individual, we will make sure to consider their age and address fears and concerns appropriately. Contact tracing will be done by interviewing the individual in coordination with appropriate local and state health resources, as warranted. Confidentiality will be maintained; we will not provide the name or any potentially identifying information of the confirmed or suspected case.

Communication

After alerting local health officials we will notify our community of families about any potential contact their children may have had with suspected or confirmed cases.

A Safe Environment To Learn & Grow

As we navigate the evolving realities of COVID-19 and the operating of our programs, we are looking ahead to what the future may look like for us. Our teams are working tirelessly to be ready for whatever comes next, but we will continue to update and change based on the direction provided by the local school districts, CDC and federal, state and local government. Amenities and programs will depend on their guidance.

We appreciate your help and understanding as we continue to strive to be better than we were yesterday.

That's our promise to you. #HomeAwayFromHome

Disclaimer

The Newtown Athletic Club is not an educational provider as a public school or a private school. Our supplemental enrichment program will support the calendar and curriculum of the local school districts.

The materials provided in this protocol book reflect the best available information at the time they were prepared. It is possible that the strategies and concepts outlined in the materials may change as understanding evolves regarding the unique challenges that COVID-19 poses. As such, information or resources provided or made available should not be considered as rigid, nor are they intended to supplant professional, informed judgment based on observed conditions. We will continually update this document to the best of our ability with respect to this ongoing and developing situation. Ultimately, our COVID-19 task force will be in continuous communication with local health officials to make the most informed decisions to keep our Camp NAC & Newtown Athletic Club community safe.
